-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 6,102,915 to Bresler et al.

Bresler discloses a shaft (13) coupled to a hemispherical head (2) that has a plurality of cutting teeth (4) and a viewing window (21,22). The cutting teeth have a generally partial hemispherical shape that allow the user to check contact between the head (2) and bone to ensure a good fit. The windows (21, 22) are configured dependent upon the location of the teeth. Bresler describes the method of use in column 5, which includes placing the device against bone, rotating the cutting head (2) and stopping rotation. Regarding the limitation “at least one convex segment”, the viewing windows of Bresler may include convex segments as seen in Figure 3.

### *Response to Arguments*

3. Applicant's arguments filed June 14, 2004 have been fully considered but they are not persuasive.

4. Applicant argues that Bresler et al. '915 does not disclose convex segments. Applicant asserts that the segment that was pointed out in the previous office action (dated March 17, 2004) is in fact a concave segment (page 3 line 1). Since that segment is considered to be concave, Applicant will then notice that any of the other circumferential segments on the window that bulge outward are thus convex.

5. Regarding the assertion that the Figure from Bresler et al. '915 cannot be considered to be prior art. The Figure was magnified to clearly point out what the Examiner considered to be the convex segment. The figure was not altered in any way except size. The invention is still considered to be a 102(b) reference based on the publication date of August 15, 2000.

***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
